**HOW DOES IT WORK?**

Each week, players are organized into groups of four to five participants according to their current ratings. The top four or five rated players form the first group, the next five form the second group, and this pattern continues accordingly.

Winners from the previous week's groups are promoted to a higher group than their rating would typically place them. Additionally, if a player finishes second in their group and their league rating is within 60 points of the 'C' player in the next higher group, they may also be moved up in the following week.

The grouping process begins by updating each player's rating for the current week. After this update, adjustments are made to promote the first-place winners and potentially the second-place finishers from the previous week.

Everyone within the group plays with each other, with no single elimination.

All matches will count towards your USATT league rating. You must play all the matches in your group. If you default your match, you will still lose rating points for that match.

Estimate ratings are given to unranked/new league players by league officials. Your league rating will be set to your tournament rating if you have one already. Remember that league ratings are typically lower than tournament ratings since players tend to improve faster than their league ratings can keep up.

All matches are 11-point games, best 3 out of 5 games. Pre-match warm-up time is limited to 2 minutes. Players must check in with the league committee 15 minutes before starting time.

This is an official USATT event. Therefore, all USATT rules shall be enforced, including legal services, coaching, breaks in between points and sets, etc.

All league committee decisions are final.
